

Climate Change

Australian Academy of Science states its views

1. What is climate change?

'Scientists use ice core samples to reconstruct climatic records
Meteorological variables such as wind, temperature and humidity are measured by instruments attached to balloons and relayed by radio to ground stations on land or on ships. by Kyle D. Gahlau

Climate change is a change in the pattern of weather, and related changes in oceans, land surfaces and ice sheets, occurring over time scales of decades or longer'

Climate change skeptics

S. Fred Singer founder of NIPCC (Non Government International Panel on Climate Change) is an atmospheric physicist and leading scientific skeptic on Global Warming who had this to say.

'I would like to see the public look upon global warming as just another scientific controversy and oppose any public policies until the major issues are settled, such as the cause. If mostly natural, as NIPCC (concludes, then the public policies currently discussed are pointless, hugely expensive, and wasteful of resources that could better be applied to real societal problems'.

According to most scientists climate change is caused by man. Therefore we are responsible to act to save the planet.

One problem exists with science, and that is that a big percentage of scientific theory is later proven wrong.

This is brought home by the two differing views of climate change listed above.

It is also troubling that it is claimed the world is millions of years old. If this is so, how has it survived for millions of years without the help of climate change scientists and their followers?.

Science once believed the earth was flat when the Bible said in Isaiah that it was round. The wonderful book of truth was later proven correct.

Isaiah 40:22 *It is He who sits above the circle of the earth, And its inhabitants are like grasshoppers, Who stretches out the heavens like a curtain And spreads them out like a tent to dwell in*

Can science be trusted?

How accurate is science?.

Darwin's theory of Evolution is now being questioned in light of new scientific discoveries.

No fossils have ever been found in the process of evolving.

Seahorse fossils said to be millions of years old are the same as sea horses today. Why is that?

Things may adapt but they do not evolve.

There is a process of life and death.

Can science be trusted. Well, maybe it can't.

Its track record would suggest its theories are just that, theories. When repeated often enough whether true or false they can become fact.

What does the bible say?

Whose earth is it?

Colossians 1:16,17 *For by Him all things were created, both in the heavens and on earth, visible and invisible, whether thrones or dominions or rulers or authorities—all things have been created through Him and for Him*

(17) *He is before all things, and in Him all things hold together*

There is good news in the above scripture for all those concerned about climate change.

All things were created by God

In Him all things hold together

Psa 104:13,14 *He waters the mountains from His upper chambers; The earth is satisfied with the fruit of His works.*

(14) He causes the grass to grow for the cattle, And vegetation for the labor of man, So that he may bring forth food from the earth.

Further good news from Psalm 104.

God waters the mountains

He causes the grass and vegetation to grow

Heb 1:3 *And He is the radiance of His glory and the exact representation of His nature, and upholds all things by the word of His power. When He had made purification of sins, He sat down at the right hand of the Majesty on high*

More good news from Hebrews.

God upholds all things by the word of his power.

Without God, science is left to its own devices to solve what is perceived as threats to God's world.

Many today, including children who have been fed a diet of fear in the education system about climate change are losing hope.

They desperately need to know the God of all hope who sustains all things, 'by the word of His power'.

Climate change for Christians

For Christians who have been drawn into the climate change agenda, Phillipians 4 has good advice about bringing our concerns to Him and leaving them there.

Philippians 4:6 *Be anxious for nothing, but in everything by prayer and supplication with thanksgiving let your requests be made known to God*

Be Fruitful Multiply. Subdue the Earth

Genesis 1:28 *God blessed them; and God said to them, "Be fruitful and multiply, and fill the earth, and subdue it; and rule over the fish of the sea and over the birds of the sky and over every living thing that moves on the earth*

In this Genesis scripture man is to be fruitful and multiply, subdue the earth and rule over the creatures

There is no mention of the the earth subduing mankind or the creatures ruling over him.

There is also no mention of curtailing the population, but rather a command to be fruitful and multiply.

We are to be good stewards of all that Yahweh God has entrusted to us. As He made the earth, He knows its resources and capability to sustain us within the commands set out above in Genesis 1:28.

Look at the Birds

Matthew 6:26 *"Look at the birds of the air, that they do not sow, nor reap nor gather into barns, and yet your heavenly Father feeds them. Are you not worth much more than they?"*

It is our Heavenly Father who feeds the birds in Matthew 6. We are told we are of more worth than them.

Psalm 54:4 *Behold, God is my helper; **The Lord is the sustainer of my soul.***

Hebrews 13:5 *Let your conduct be without covetousness; be content with such things as you have. For He Himself has said, **"I WILL NEVER LEAVE YOU NOR FORSAKE YOU"***

Psalm 54 & Hebrews 13 bring perspective into the woes of the world concerning climate change.

It is the Lord, the One who never leaves us or forsakes us, who sustains our very souls.

Disaster, Disaster, Disaster

It is November 2019 in Australia and fires are burning across the States of Queensland and New South Wales.

There are currently 80 fires burning in Queensland and 73 fires burning in New South Wales.

Efforts are being made to connect these fires and a prolonged drought to Climate Change.

Climate Change/Global Warming theory has been around for about 40 years. If It is causing fire and drought then it would be only logical that there would not have been fires at this scale prior to Climate Change causing them.

Here are some facts from 1967 almost a decade prior to the Climate Change theory.

Tasmania, Australia's Island State 7/2/1967

Fires burned over 2,640 square metre of land in 5 hours.

62 died

900 were injured

7,000 left homeless

1500 vehicles, 80 bridges, 4,800 sections of power lines were destroyed.

Is anything happening now that has not happened before?

Clearly the history tells us these types of disasters have always occurred, and well before Climate Change theory.

Our family has photos of our grandfather rescuing cattle stuck in the mud of a dam during drought.

This drought would have been in the 1940's, 35-40 years prior to climate change theory.

Droughts, fires and floods have always occurred in history.

Disaster Fact Find

Queensland

On the 17/10/2018 the Queensland government in Australia passed laws decriminalising abortion.

Laws that are said to be some of the worst in the world with abortion after 22 weeks with the agreement of two medical professionals.

The laws came into effect on 3/12/2018.

In February 2019 just a few months later the Queensland city of Townsville had the worst flooding in its history.

Damage amounted to \$1,243 billion dollars

3,300 homes were flooded

1,500 homes were uninhabitable

500,000 cattle perished in the surrounding areas

Is it possible these disasters have nothing to do with climate change and everything to do legislation that is an affront to the Lord God Almighty. Could it be that our politicians, who appear to lack normal emotions for the unborn child are positioning our states in a place where we are reaping the penalty due because of our evil.

Life Knit Together in the Womb

Foetuses are knit together by God in the mother's womb, they are made in His image.

Is a child sacrifice to Molech any different from a child in the womb with a heart beat, having its life snuffed out for non medical reasons?

Perhaps the god of self is alive and well?

Disasters Just Months After Abortion Decriminalisation

Two other states in Australia have suffered similar fates after abortion decriminalisation. The timing of these disasters so close after the abortion legislation in Queensland, and New South Wales does not point to coincidence or global warming.

Victoria's Fire disaster was also only months after the decriminalisation of abortion only it was about ten years earlier.

In other words after the decriminalisation of abortion in these three state in 2008, 2018 and 2019 they have all experienced disasters within months.

In December 2008 the state of Victoria decriminalised abortion.

Victoria

Just 2 months later they experienced catastrophic fires.

400 fires burned, 180 lives were lost, 414 were injured, 7,500 were left homeless, 2029 homes were destroyed, 3,500 other buildings were lost,

19,000 personnel were deployed and 450,000 hectares (1,000,000 acres) were burned.

New South Wales

Sydney is the capital of the Australian state of New South Wales.

For weeks now during November 2019 fires have been burning across the state.

Almost 500 homes have been lost, 56 fires burned, 4 lives have been lost and already 1,650,000 hectares has been burned.

As fires continue to rage it is anyone's guess what the final loss to life and property will be.

The static's above show disasters happening just months after abortion decriminalisation. It is no surprise then that there has been disastrous fires in NSW. They began just one month after abortion was made lawful in October 2019.

These three disasters establish a pattern as they have all occurred within month of abortion legislation.

The NSW abortion laws also allow termination up to 22 weeks with the agreement of two doctors. Some provisions apply for abortion after 22 weeks.

Sin has consequences, as it reaps its wages.

Isaiah 14:27 *"For the LORD of hosts has planned, and who can frustrate it? And as for His stretched-out hand, who can turn it back?"*

Many of us have lived through the 'all out nuclear war' fear that were prevalent in generations past.

In 1999/2000 the Y2K manufactured panic cost around \$435 billion.

Playing Off Fear And Anxiety

We are now being kept in fear and anxiety about climate change.

It appears there is value in keeping mankind in fear and anxiety at all times about some impending gloom or disaster.

No to mention the billions of dollars that is spent often needlessly.

Climate Change Costs

From 2008-2018 the USA has spent US\$350 billion on climate change. Cost up until 2050 including the disasters climate scientists believe global warming will cause is estimated at US\$50 billion per year. That represents another US\$1,600 billion over 32 years. (Stastics sourced from marketwatch.com)

These enormous amounts of expenditure beg the question “is climate change/global warming more about stimulation of the world economy than it is about the climate?”

There is no consensus amongst scientists about the threat to our planet caused by climate change. As we have seen some scientists conclude there are mostly only natural causes at work.

Psalm 135:6,7 *Whatever the LORD pleases, He does, In heaven and in earth, in the seas and in all deeps.*

(7) He causes the vapors to ascend from the ends of the earth; Who makes lightning's for the rain, Who brings forth the wind from His treasuries.

In Psalm 135 the Lord does whatever He pleases in the heavens and earth the seas and the deep.

He causes vapours to ascend to the ends of the earth, he makes lightning for the rain and brings wind from is treasury.

The bigger picture

There is a bigger picture.

For too long all the godless scientist, activist, rebellionist and programmes promoting climate change have propagated their message loud and clear.

That bigger picture screams from the pages of the bible and puts into context who is over, above, and in all things.

If the climate is changing, God is in it.

If the climate is changing, God is allowing it.

What we discovered about God and Climate Change

We have discovered that according to science the earth was once flat but is now round as the Bible said it was.

All things were created by God.

In Him all things hold together.
God waters the mountains.
He causes the grass and vegetation to grow.
God upholds all things by the word of His power.
Man is to be fruitful and multiply.
Man is to subdue the earth.
It is our Heavenly Father who feeds the birds.
We are worth more than those birds
The Lord sustains our very souls.
The Lord never leaves us nor forsakes us.
The Lord does whatever He pleases in the heavens and earth, seas and the deep.
He makes lightning and brings wind.

Isa 40:22, Col 1:16,17, Ps 104:13,24, Heb 1:3, Gen 1:28, Matt 6:26, Ps 54:4, Heb 13:5. Ps 135:6,7

We have also discovered that abortion touches God's heart.
Three Australian states experienced catastrophic disasters within months of passing laws to legalise abortion.

As His children we can be secure that he is always in control.
All His promises are Yes and Amen in Christ Jesus (Yeshua)
What He says He will do.

On a lighter note.

Psalm 2:4 *He who sits in the heavens laughs, The Lord scoffs at them.*
The Lord has the last laugh!
